

CLEANERS & DE-GREASERS

LECTRA CLEAN II – Heavy Duty cleaner for degreasing and decarbonising electro-mechanical metal parts and equipment, Non-conductive & Non-Corrosive.

INDUSTRIAL DEGREASER – Food Processing Safe, heavy duty cleaner & degreaser for mechanical equipment. Removes grease, oil, lubricants & dirt from equipment. NSF class K1 registered.

FAST DRY DEGREASER – Fast drying, powerful degreasing solvent. Quickly penetrates and dissolves grease, oil, dirt & contaminants. Stable, Non-Staining and Non-Corrosive. Fast evaporation to minimize downtime.

QD CONTACT CLEANER – Stable, inert, quick drying solvent cleaner for precise cleaning of light contaminants, dust, dirt, traces of oil on electric or electronic parts. High purity cleaner formulated for applications where sensitive plastics are involved.

CO-CONTACT CLEANER – Food Processing Safe, Fast drying, residue-free contact cleaner for use on PCB's and electronic equipment. NSF class K2 registered.

LUBRICANT - OILS & RUST LOOSENER

3-36 - Multipurpose spray displaces & seals out water & moisture. Loosens metal parts seized by dirt, corrosion or dried-up grease. Stops rust & corrosion on all metal & metal alloys.

ROST FLASH - Quick penetrating oil with freeze shock effect, destroys the structure of rust and corrosion using thermal shock (reduces temperature by 40°C). Loosen metal parts seized by dirt, corrosion & dried-up grease.

RUST OFF IND - Quick action penetrating and lubricating oil for hard-to-reach areas. Disperses rust, scale & other oxides, frees metal parts seized by dust, rust & corrosion. Leaves a lubricating film.

PEN OIL – Food processing Safe, Non-Silicone lubricant with excellent penetrating properties. Quickly frees and lubricates seized mechanisms. NSF Class H1 registered.

CHAIN LUBE IND – Long lasting lubricating oil with excellent penetration properties for use on rollers, chain, conveyor belts in processing equipment. Quickly frees seized and rusted bolts, nuts & other metal components. Highly resistant to water wash off.

CORROSION PROTECTION

SP 350 – Heavy duty Indoor protection up to 2 years or Outdoor protection up to 1 year (when covered) from corrosion. Forms a thin penetrating protective film, which does not dry.

SP 400 - Long-term outdoor corrosion protection up to 2 years. Forms a waxy protective film which does not become brittle and protects against heavy corrosion during overseas transport or seasonal corrosion protection.

GALVA SHINE – Excellent touch-up paint for hot galvanised pieces. Protects metal and alloys to preserve its shine and intensive colour for a long time.

INOX 200 – Anti-Corrosion coating for Stainless Steel surface. Fast drying coating to be used as touch-up paint for welding seams or while mounting a stainless-steel construction.

GALVA BRITE - Protective zinc-aluminium coating, combining corrosion protection with the luster look of aluminium. Providing an excellent adherence to metal surfaces.

WATER - BASED CLEANERS

SCALE REMOVER – Powerful de-scaler for removing deposits of lime scale and rust. Restores & improves surface finish. Suitable for use on most metals and plastics. Can be diluted up to 1:20 ratio for varying level of scale.

TRAFFIC FILM REMOVER - Heavy duty vehicle grime cleaner for removal of traffic film and general environmental soiling. Can be diluted from 1:20 to 1:200 ratio. Can be used with manual as well as automatic pressure washing equipment.

HEAVY DUTY DEGREASER – Highly concentrated detergent degreaser. Quickly removes oil, grease, silicones and heavy grime. Can be diluted from 1:6 to 1:40 ratio depending on the level of soiling.

GRAFFITI REMOVER – Quickly and easily dissolves & loosens unwanted paints, Graffiti & inks from aerosols, pens and markers. Does not leave an acid or alkaline residue.

ECO COMPLEX BLUE – Non-Flammable, water based concentrated cleaner for removing heavy contaminants. For use in Food processing & Non-Food processing areas. NSF class A1 registered. Can be diluted up to 1:100 ratio for varying contamination.

SPECIALITY PRODUCTS

URETHANE ISOLATION – Air drying conformal urethane insulation coating for electrical/electronic equipment, motor windings, battery terminals, solenoids etc. It seals out water and moisture and acts as a barrier for contaminants.

BELT GRIP – Food processing safe, adhesive belt lubricant. Stops slipping and squeaking. Prevents slippage on flat, round and V-belts. NSF Class H1 registered.

ECO LEAK FINDER – Food processing safe, gas leak detector which quickly detect leaks in gas conducts, pressurized systems and installations by forming highly visible bubbles. NSF Class P1 registered.

MINUS 50 – Inert, Non-flammable coolant, down to -50°C, for electrical and electronic maintenance, troubleshooting and repair. Used to cool down parts and components during soldering / de-soldering, detection of hairline cracks and tracking of intermittent faults.

WIRE ROPE LUBE – Heavy duty lubricant for internal protection of open gears, wire ropes, racks and pinion etc. Deep penetrating lubricant forms a dry non-peeling film over the surface.

POLYMER PROCESSING

MOULD PROTECT – Transparent, Non-Silicone based long-term corrosion inhibitor for mould tools. Repels and displaces moisture, leaving a durable, wax-like protective film.

BLUE MOULD PROTECT – Food processing Safe, blue colored corrosion inhibitor for short term protection of mould tools. Does not contain Silicone. Provides an easy visual method for ensuring complete coverage. NSF class H2 registered.

MOULD CLEAN – Powerful solvent blend for cleaning injection mould tools. Quickly remove soils, grease, old protective films & deposits. Leaves a clean, dry & residue free surface.

NSR DRY – Medium duty, Non-Silicone based mould release agent for thermoplastic, some thermosetting plastic and many type of rubbers. Operational up to a temperature of +150°C.

SR MULTI – Multi-purpose, medium duty, silicone-based mould release agent for thermoplastic and many more rubbers. Provides improved surface finish. Operational up to a temperature of +200°C

SILICONE – Food processing Safe, Non-toxic, synthetic lubricating oil and release agent. Works as an excellent electrical insulator and non-flammable coating. It reduces friction and noise on Non-metal parts. NSF class H1 registered.

WELDING PRODUCTS

INOX WELD KLEEN – Restores the original characteristics of Stainless Steel after welding or heat treatment. Degreases and cleans the surface of welding area and eliminates all color effects.

ANTI- SPATTER – Non-Flammable, Non-Silicone based solvent. Prevents spatter adhesion on welding equipment, work piece and jigs. Does not affect post welding operations.

CRICK 110 (CLEANER) – Stable, Non-Corrosive, Fast drying solvent cleaner for removing dirt, grease & contaminants from the surface, prior to liquid penetrant inspection. Does not leave residue.

CRICK 120 (PENETRANT) – Red colored penetrating colorant to mark the tiny cracks and failures in mere 10 to 20 seconds, which are difficult to detect by normal visual inspection.

CRICK 130 (DEVELOPER) – Quick drying developer for Non-destructive testing of surfaces and structures. Magnifies and makes each trace of Crick 120 visible after the developer has been applied for at least 7 minutes.

ELECTRONICS RANGE – KONTAKT CHEMIE

PLASTIK 70 – Quick drying transparent conformal coating for PCB. Provides a protective insulation film against moisture, dust or corrosive vapours. Operational from a temperature range of -40°C to +60°C.

FREEZE 75 – Non-flammable, inert dry coolant spray with a strong cooling effect gives a reduction in temperature to -45°C. Freeze 75 is having a very high material compatibility

ANTISTATIK 100 – Forms a thin, invisible film with sufficient electrical conductivity to reliably prevent the electrostatic discharges from plastic surfaces, textile, car seats and fabrics.

DUST OFF 67 – High pressure, inert, liquified gas that removes dust and loose debris. Prevents component errors, downtime and damage caused by microscopic dust. Does not leave residue.

KONTAKT PCC – Quick drying, special dirt cleaner and flux residue remover for Printed Circuit Boards. Comes with an add-on brush-type spray head. Does not leave residue.
